

COLOUR WHEEL

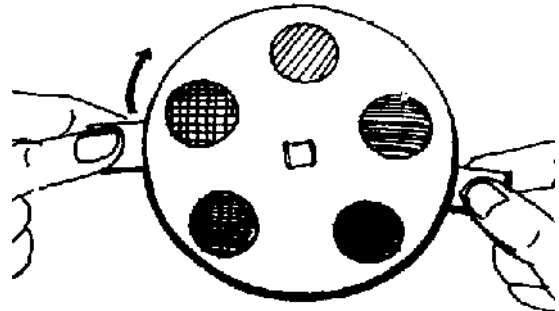

6. Cut two 10-cm. discs from card-sheet. Cut five circular windows in each disc with a divider.

7. Stitch one half of the press-button in the centre of one disc and the other half in the second disc.

8. Stick different colours of gelatine papers on the windows. Now assemble the discs by snapping the press-button. Attach two cardboard handles to the discs. The handles will help in rotating the discs.

9. Rotate one disc while keeping the other stationary to see a motley rainbow of colours on your colour wheel.
