

PAPER DIAMONDS

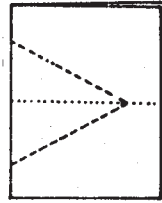

1. First fold a sheet of rectangular paper into half.

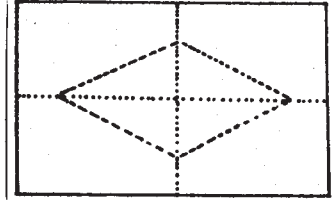

2. and then into quarter.

3. Fold a triangle at the left-bottom, four fold corner (the centre of the paper).

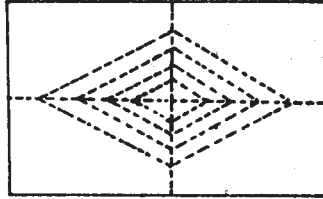

4. On opening one layer you will see half of the diamond.

5. Open fully to see an elegant rhombus in the middle of the paper.

6. If you make several parallel creases at the four fold corner then ...

7. on opening you will see a diamond in a diamond in a diamond - a series of nesting diamonds or rhombuses.
