The diagram illustrates the six steps of creating a CD-coin spinner. Step 1 shows a coin being heated in a gas flame with pliers. Step 2 shows the hot coin being pressed into the center of an old CD. Step 3 shows the coin being inserted into the CD's center hole. Step 4 shows water being poured over the CD to cool the coin. Step 5 shows a color disc being attached to the CD. Step 6 shows the coin being held along the rim and spun.
