

PAPER HOUSE

1. Take a stiff square paper with an edge length of about 20 cm. Fold 16 small squares in it.

2. Cut along six quarter lines as shown.

3. Put one middle square exactly on top of the other and stick them with glue. They will make the triangular roof of the house.

4. Stick the two end squares to make the side wall of the house. Do the same on the other side to complete the house.

5. Using different sizes of squares you can make houses of different sizes. You can cut doors and windows in them. The outline of the house can be drawn on a big cardboard. Children can make the rooms, furniture, kitchen etc on the cardboard and then cover it with the paper house.
