

1 Sandwich thread between two paper flowers and leaves.

2 Use three holes in the conical part and central hole of a pen body.

3 Pass the flower thread through the main hole and leaf threads through three separate holes in the sketch pen.

4 Tie the ends of all four threads to a bead.

5 When the thread is loose the flower and leaves appear wilted.

6 On pulling the thread the flower and leaves will stand upright and make a bouquet.
