HAPPY FATHER'S DAY

Happy Father's Day to all the dads in Iran! Today, on the birth anniversary of Imam Ali, the first Shia Imam, Iranians celebrate Father's Day and Men's Day to recognize the importance of fathers in families, society, and the Islamic faith. This day is observed on the 13th of Rajab in the Islamic calendar, which fell on January 14th this year. It's a wonderful opportunity to honor paternal bonds and spend time with fathers and grandfathers.

“THE WORD OF GOD IS THE MEDICINE OF THE HEART”

IMAM ALI (A.S)

My best friend

In the name of God, my topic is about our close friend, her hair is neither long nor short, it is average, She is very kind and very calm and very patient, her eyes are green, and she is of average height, her English is good, and she speaks She also reads books.

Rezvaneh Baghban

Hello. My name is Mahya. My best friend is named Melika. I am in love with Melika and Zahra. These 2 people are my close friends.

Mahya Nasiri

My best friend isn't very tall and she's not as much fit , but she's pretty and kind .

She's hilarious , and sluggish in walking . She has long dark hair and dark eyes , too .

As I told , she's so kind and good tempered , I love these behavior of her

Helma Afsharnouri

My best friend

My best friend is myself because the only person who wants me to be 100% good is me.

Artificial intelligence is very effective in our lives because if it weren't for it, it would take days to research a problem, but with the advent of artificial intelligence, that research is ready in a few minutes. If it weren't for artificial intelligence, we would have to ask a lot of questions to others or read books to find our own questions, but with artificial intelligence, we can find the answers to our questions very quickly and easily, so as a result, artificial intelligence is very effective in our lives.

Fatemeh Mobasher

she is Forough she is 13 years old she has one brother and and no sisters. she's from Tehran she was born in Tehran she was born in 16th Bahman she is good at playing volleyball and football she is very funny . she's really likes to watch film she is good at her listening. she's tall and thin. she has long hair she is a real fan of Liverpool.

*

This question is hard for me because I have many friends and I am close with many of them, but when I think about this more and get deeper, I understand that someone who has always been by my side and is very important to me and I love him. Who, he is my best friend! Her name is Niayesh, that girl is very kind and very cute :)

She is 15 years old and my classmate. She is a good-hearted girl and accepts me no matter what I am. She is a wonderful girl

Dina Madani

Zainab is my best friend and her birthday is in a few days. She is a good friend. Her personality is kind, sad, funny and funny. Unfortunately, her studies are very good and I am sad about this. Zainab's appearance is tall, long hair, almost dark skin and semi-large eyes. Zainab's clothes are very beautiful and Zainab has different styles. Her favorite food is barberry pilaf and fried chicken. Her favorite colors are purple and black.

Fatemeh

Hossein Ahmadi

Fatemeh is my best friend she is clever and hard working she helps me at writing my homework we go to the gym every day she is a good cook and she makes cake very well Her favorite lesson is science and I like science too I talk to him a lot

Zeinab Makki

My best friend is Tasnim shy is very clever and kind she always helps to other people she's very good at math she has website in Robica and she work with her phone she's very helpful and generous she always so busy because she has planning for every day

Zahra Abdiyan

My best friend

My best friend is a girl who is medium height, thin and beautiful. She recently cut her hair and has changed a lot.

Eight years have passed since the beginning of our friendship, the day we talked and got to know each other while playing with the slide in the school yard.

“You have almost the same interests and even have the same face.” We have heard this sentence a lot and we agree with it.

I remember that in the first years of our friendship, we used to play an interesting game. We would hold each other's hands and turn and turn and turn and with the 1...2...3 we would let go of each other's hands and each of us would fall to a corner.

I hope our friendship will continue and both of us will fulfill our promise "we will stay together forever".

Zeinab Bastami

Hello my name is Maedeh and my best friend's name is Fatemeh .

Today I want to talk about her .

She is 15 years old and Iran is her country .

She is very kind and generous girl .

She is a girl with brown hair and eyes.

Pasta is her favourite food and she loves Fesengoon .

And her favourite color is blue .

Peptalk English Academy

We all in our lives need friends because we need to be loved and have someone to be by our sides and listen to our problems
I think at this age we all have had a lots of friends and even in some friendships we got hurt but I think at the end we learnt something from all friendships
Beside so many good or bad friends we all need a bestie who is more close to us and don't leave our side in happiness and sadness and never doubt us in our friendship
Also choosing good friends and best friends is so hard because deciding impatiently or without knowledge might hurt us but as I mentioned earlier we would learn a lot from bad friends
Now I want to introduce my bestie who was there for me all the time and she is a really ride-or-die friend
Most of the time she is talking because she is so an extrovert person
She is talented in painting
I think maybe she can even become an artist or a big animator
As I said she is so perfect at painting and she has given me so many paintings which made me happy
She likes to go to art school although unfortunately, her dad wouldn't let her and I think her talents and creativity will waste
I like her and I think we've been through a lot such as so many fights and sulking
For example, I think one time we were really on edge and we were able to grow apart for the rest of our friendship
In the end, I want u guys to know that friendship is as effective as a family because most friends are the same age as u and they will impact u even more than family
So we should make a lot of friends but be careful who u choose to become your bestie or friend
By Paying attention to who u are choosing u will avoid getting hurt and be happy in friendship and make good memories
Good friends will make each other progress
I hope u enjoy

Fatemeh Varahram

Childhood Memories

Hi! I'm Hasti.

Once upon a time, when I was 8 years old, I came back home from school. I expected everyone to be home but when I opened the door I found myself alone. Nobody was there. I was a bit worried but I didn't want to think negative. I called my parents but They didn't answer. I burst into tears because my sister and brother weren't there too.

Suddenly the light went out . I felt scared. But then I heard, Surprise! My sister, brother, and my parent jumped out from hiding, celebrating my birthday! They had a cake and decorated the yard.

It's the best birthday ever!

Hasti Dastani

When I was a child,

I had a little chick named Tala

One day, just before the end of summer vacation and the start of my second-grade school year , I was playing with Tala. After playing, I put her in her cage on the

balcony and closed the balcony door.

But I didn't notice that her head was stuck in the door, and she passed away.

I didn't close the cage door properly, and since she always followed me to play, she came out of the cage without me noticing.

When I saw what happened, I cried a lot.

My mom told me to give her water so she wouldn't leave this world thirsty.

The next day, when I came back from school, I was feeling very sad.

Suddenly, I heard the sound of chicks chirping.

At first I thought I was imagining it, but then I realized that my mom and dad had bought me two new chicks.

This memory is both sad and happy for me.

Saba Habibi

Your favorite childhood Memory

I was a few months old. My mother sat me down on living room's carpet. She gave me an ice cream. She was cooking dinner in the kitchen and talking to me. After she finished cooking our dinner she came to the living room. She saw I fell down on my back with my ice cream and I fell asleep. I think this memory is so funny.

Sara Taheri

It's come back to my birthday my 7th birthday in 2018 and my team for birthday was a frozen and also I was Elsa and all of the cakes balloons and another thing for design was Elsa and Anna at first we had a lot of guests such as my friends my aunts and my uncle's which their child's my birthday was in the villa and actually a garden that was a very nice place I went to bourbon and made my hair look like Elsa and I did makeup I wore dress like elsa's dress and that time my first favorite movie was Elsa

I did everything that I wanted in that birthday we had different snacks cup cakes chips jellys and the important one was a lot of game , like video games volleyball or football tennis some games like competition with winner Of the last the best part was for presents I got a lot of different toys clothes ,money ,....
The End

Arefeh Foghani

When I was 5 years old and I was very little I went to grandparents home at lunch and this memory is about summer and the weather was so warm. I ate lunch and after I watched TV. and I played with my toys . When I was little I loved toy story animation and I used to think that toys could speak very well . that was a creative idea. this is my favorite memory.

**Fatemeh Sahba
Asgari**

Great memories of your childhood

about 8 years ago , my sister decided to meet my grandmother at 2 o'clock !!!!
it was really shameful but I couldn't take her alone ,so I went with her and ringed her bell (pay attention: grandmother's home was across the street)

as you can guess my poor grandmother was shocked and asked us «what are you both doing here» and we said «nothing!! just come here to see you dear» she didn't believe us but accepted to join watching TV with her 😊
but finally in the morning she called my mother and said «where are your children» , my mom said «inside their room, why?» grandma said «the children are with me»

**Hosna Sadat
Armakan**

I have many childhood memories. One of my memories was living with my grandmother and grandfather. Because I was their last grandchild, that's why they loved me so much. Whenever I was bored, I would go to their house and they would play with me so much that I enjoyed it very much. And I experienced all kinds of mischief in my childhood.

Reyhaneh Ghaderi

once upon a time I and my friends went to the field trip from our school to " Kashan" city we went to this city by train and we had a good and funny time and memories in this vehicle :I want tell you one of them
!I have a packet of seeds with ranch sauce flavor and I like this more than all my foods
I opened this in the train to eat with other but I don't know what happened that the most delicious seed in the world was spread on the floor
That moment my heart was broke and my friend laugh at me
?!!but I didn't pay attention and collected all the seeds and ate them and I just don't know why they were getting upset

**Yeganeh Zahra
Joharifard**

When I was a child I liked to be surprised. In 17th of bahman when I came back to our home and opened door, my relatives clapped and said “HAPPY BIRTHDAY”. Yes, 17th of bahman is my birthday and they surprised me. My uncle bought a cake for me. Its pattern was a duck that have big blue eyes. When I saw its eyes. I was scared and I cried. Then I gave lots of presents and lovely gifts and at the end we went to restaurant and ate dinner

BENEFITS OF Artificial Intelligent

FATEMEH SADAT ALLAMEH

Artificial intelligence has so many effects in our life AI help us to find the answers of our questions and AI give us a lot of information AI decrease human errors and can help us to make better decisions

ZOHREH KOLAHDOUZ

AI is able to write a text , solve math questions , consultant us , write a summery about a text and make pictures and so it could help us a lot in our life and now , also is using in Metaverse technology that is very usefull also, AI can explain what you want very much better than Google because it could explain it with your specific conditions that you had tell it for example we can use chatgpt for write a text and you can argument with it AI will give us information without using any opinions or believes So it is very effective in our life right now and it will be more effective

YEKTA SALMANI

I think AI is very predictable. I disagree with many people's opinions , that says AI is very useful. you know AI in our life is good and we can use it for our projects and works and some questions that we have or stuff like that but i think it makes people lazy and it cand be dangerous too. I saw many people that they are dependent to AI and It will ruin friendships in real life and humans are just friend with a existing that its not real and alive and it makes me sad to be dependent to someone that is not alive. Apart from all these things of course AI has got lots of posetive points too i use it too in my life many times but i didnt let my self to be affiliate to AI and makes me lazy . AI can be very influential provided that people can use it in good ways

BENEFITS OF Artificial Intelligent

FATEMEH SADAT ALLAMEH

Artificial intelligence has so many effects in our life AI help us to find the answers of our questions and AI give us a lot of information AI decrease human errors and can help us to make better decisions

ZAHRA KARAMI

Artificial intelligence can often help us in the fields of education, communication, writing magazines and many other things, but it can also be harmful. Because we have to try to collect this information ourselves and to some extent the help of artificial intelligence can be effective in life. It may even be true that artificial intelligence and robots will become as intelligent as humans, so it is not always effective.

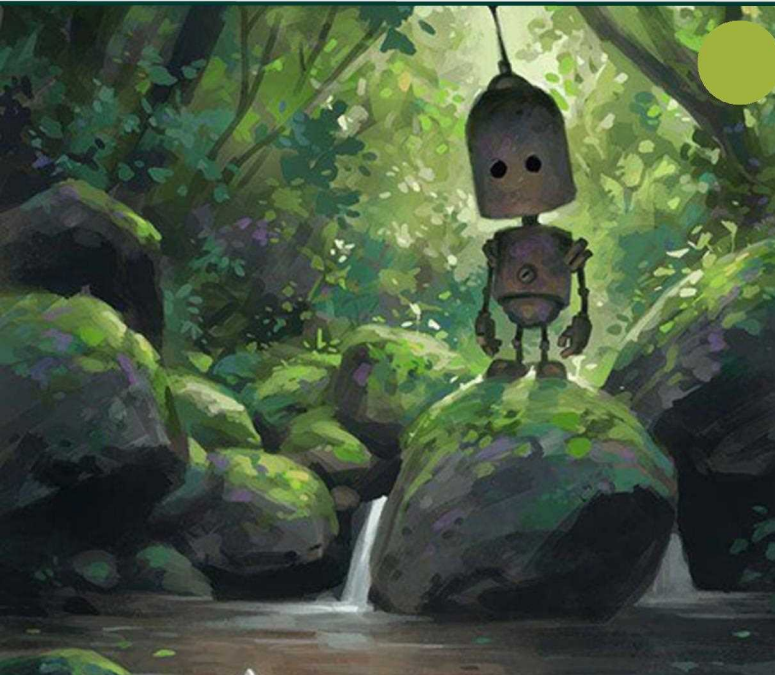

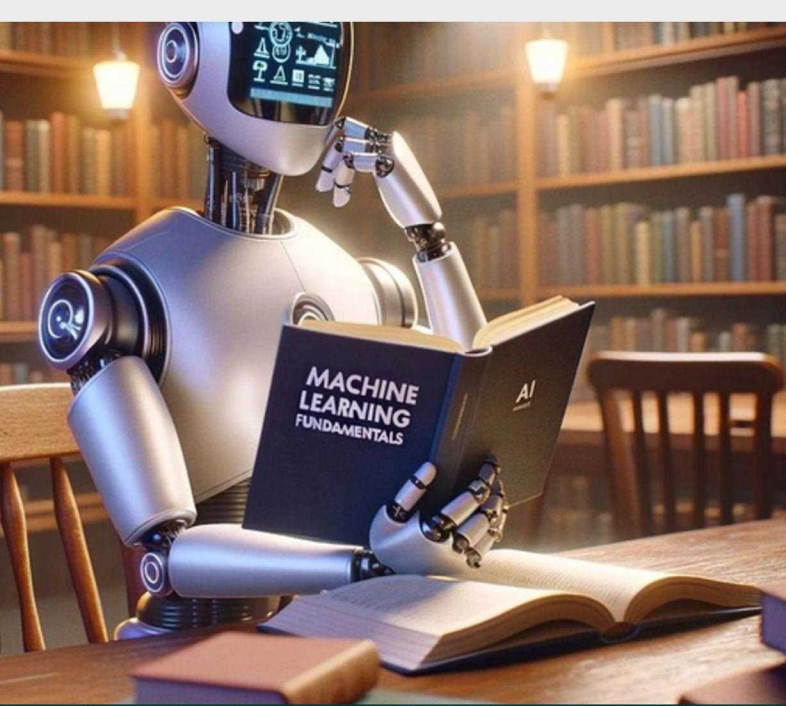

GOLSA HOSSEINI

Artificial intelligence has many effects on our lives. AI system can perform tasks faster and more accurately than humans. AI plays an important role in diagnosing diseases. Cars with AI systems can navigate automatically. Services like Netflix, YouTube and Spotify use algorithms to analyze users ' viewing habits and suggest appropriate content. As another wonder of artificial

intelligence, it can be mentioned that AI has created conditions so that people who have no knowledge of

programming languages or graphic design can create their own website and creatively create graphic posters in a short time.

B) Artificial intelligence has many uses in today's life, by using this program we can increase our information, compare information and do our work well and with better quality. This program can provide us with or check the best data among several websites and books and data and do many beneficial things in our life and create prosperity. On the other hand, although this artificial intelligence has many capabilities, it can easily provide user information to the owner of the program or programmer and use them. On the other hand, because people have easy access to information, they study less. And some people no longer seek knowledge.

SETAYESH BABAEI

NAZANINZAHRA NAFISIRAD

My topic is about artificial intelligence in human life. I want to talk about some of the advantages and disadvantages of artificial intelligence.

Artificial intelligence has many benefits in our lives

For example

In applications of artificial intelligence in education

Improving the diagnosis and treatment system in the health sector

Advancing creativity and design:

Artificial intelligence enhances creativity by helping people who have not received formal design training to create professional graphics, logos, videos or music.

Reducing human error:

One of the biggest advantages of artificial intelligence is that it can significantly reduce errors and increase accuracy.

It also has disadvantages such as laziness, high cost, increased unemployment, lack of creativity,

...
