An Interview with Ms. Mohammadi about 8th graders

By Nazanin Zahra Mansouri

4

Bahman 22nd

This time, Students are the teachers

Hey there, fellow students! Have you ever found yourself daydreaming in class, wishing that learning could be more fun and exciting? Well, guess what? It can be! All we need is a dose of creativity. In this article, we explore how creativity can turn boring lessons into unforgettable adventures and the impact it has on our learning experience.

This time around in Noor Times, we're on a mission to discover the day as a teacher! So, grab your capes and get ready to join the discussion on the interesting activities students would like to have if they were teachers. And remember, creativity is their secret weapon! Get ready to explore how creative activities can spark your imagination and make learning an exciting journey you'll never forget!

Fun Lessons: I would plan lessons that include hands-on activities and group work so everyone can join in.

Different Learning Styles: I know everyone learns differently, so I would use pictures, sounds, and movement to help everyone understand.

Encouraging Thinking: I would ask open-ended questions and present real-life problems for students to think about and be creative.

Using Technology: I would use online tools and apps to make learning more exciting.

Positive Environment: I would create a space where all students feel comfortable sharing their thoughts and feelings.

feedback and Reflection: I would give helpful feedback and encourage students to think about what they learned.

Fun Activities: I would add games or interesting activities related to the lesson for variety.

Getting to Know Students: I would take time to learn about each student's interests and challenges.

Encouraging Questions: I would create an environment where students can ask questions without fear of being judged.

Summarizing and Evaluating: At the end of the day, I would summarize what we learned and ask students for their thoughts.

Zahra

Ashtiyani

7th grade

*I don't want to be a teacher.
But if I were to become one, I would be
a very strict teacher, but sometimes I'm
very kind. I hope I become a popular
teacher for my students. 🍀❤️*

Mahya Nasiri

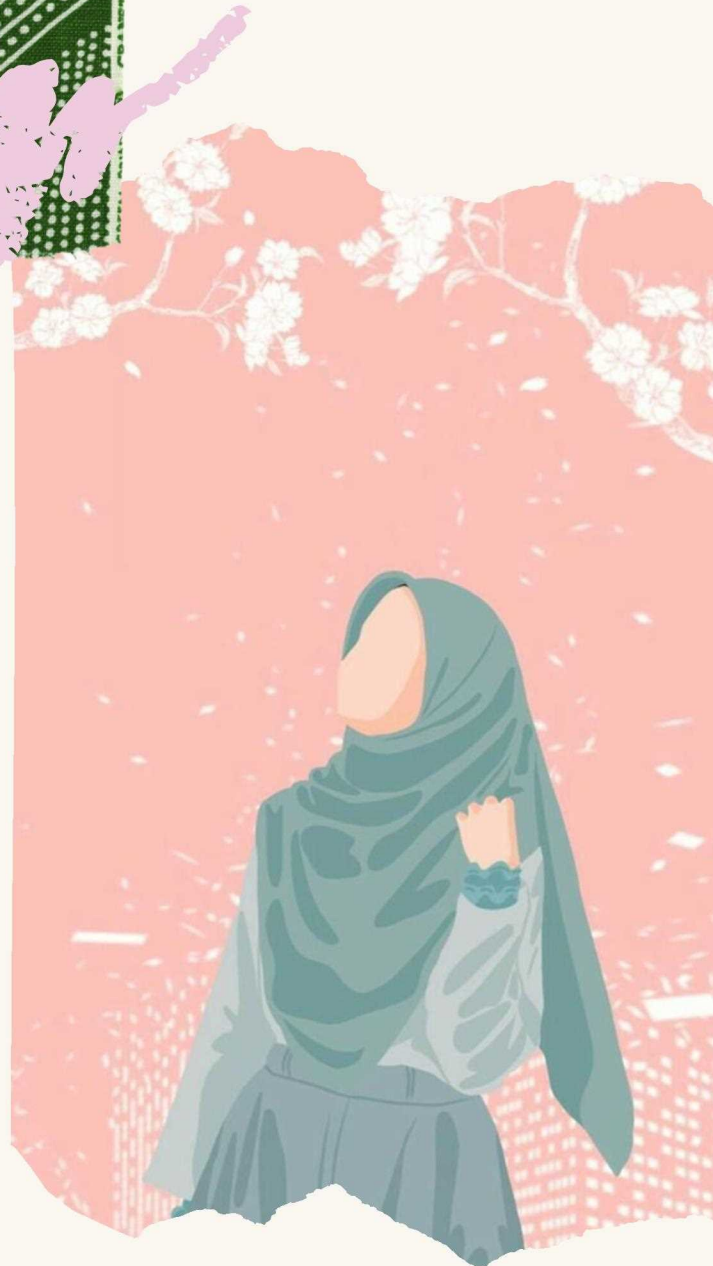

7th grade

If I were a teacher for a day I would try my best to treat my students happily. We would dream, read books, draw, sleep talk or maybe even go to the yard and play. I would listen to them all day long and do whatever they desire. At last, I'll try to do the things that make them happy, even for a day!

If I were a teacher...

Reyhaneh Mshdizadeh
8th grade

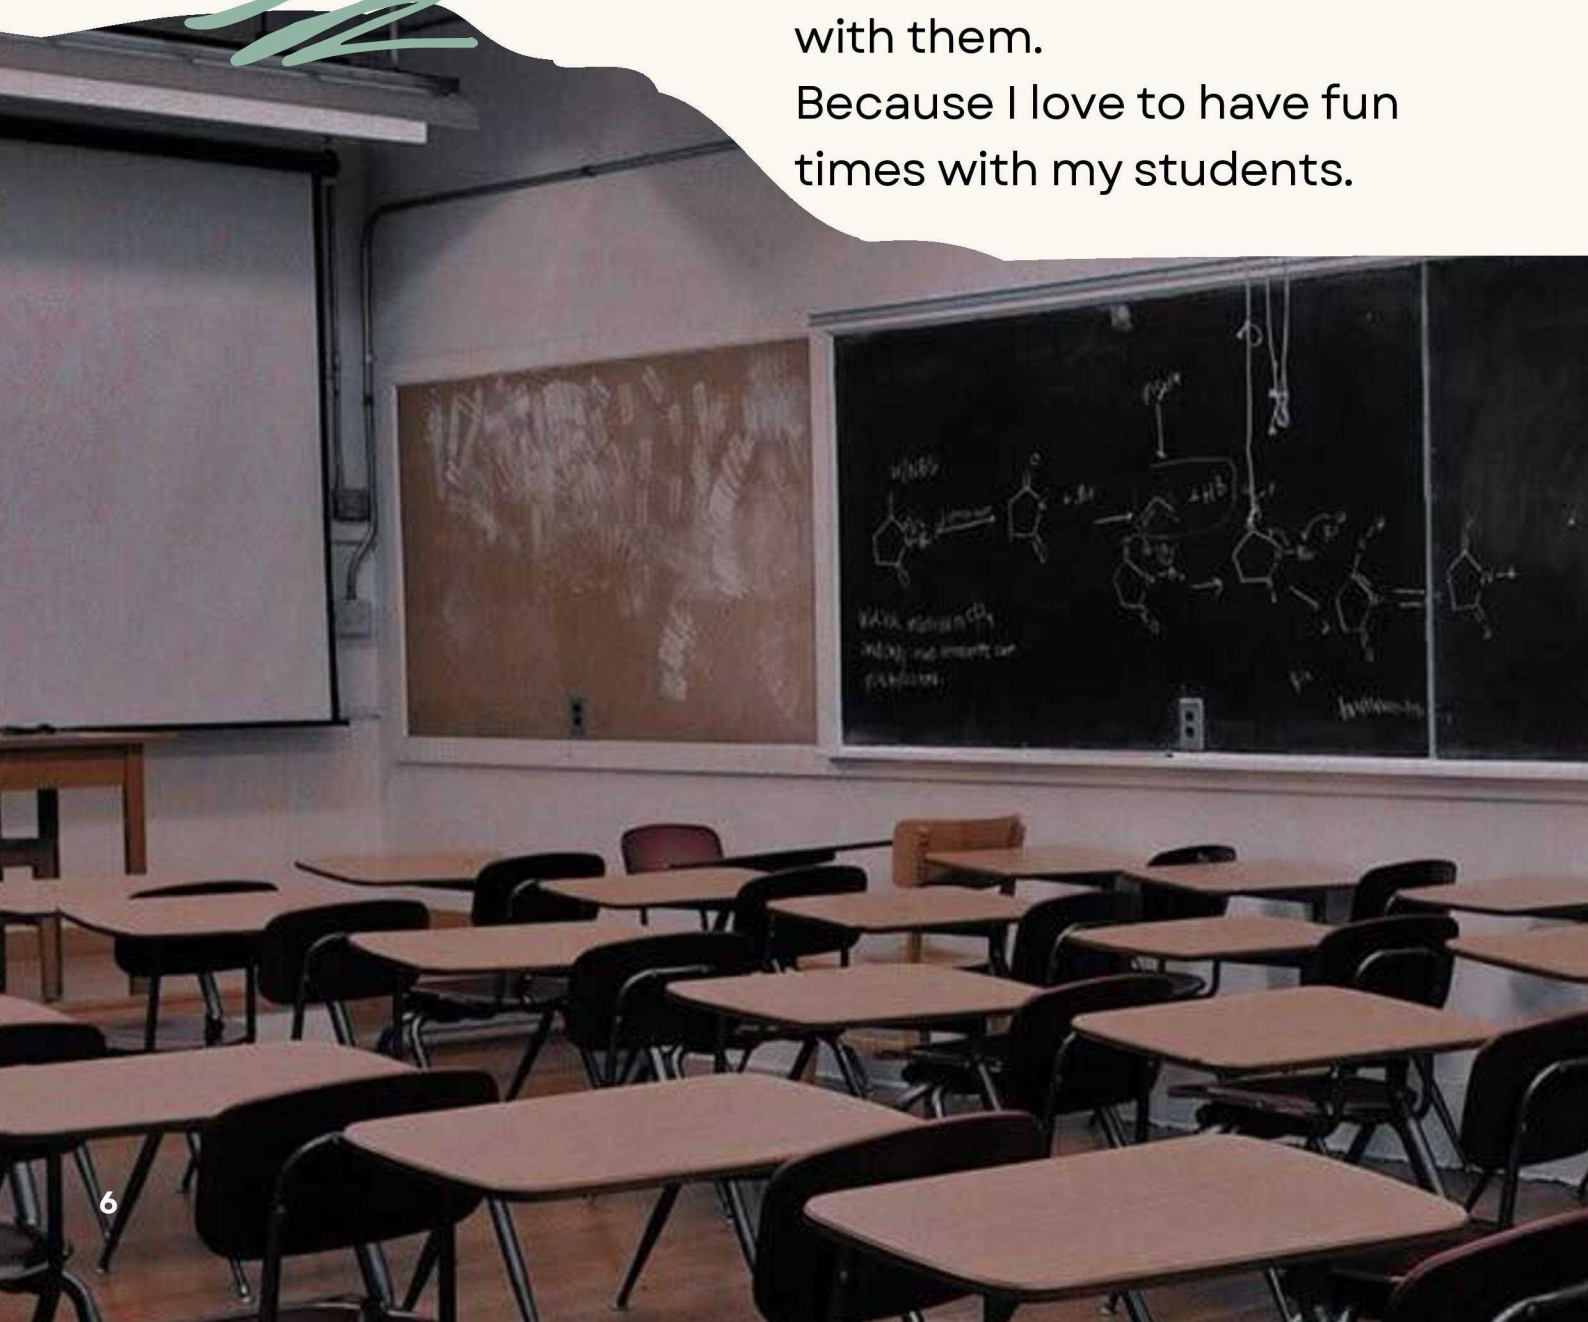

If I were a teacher, I would attend my first class in the yard. And I would make sure that my students are having fun. After playing we would go to the class to introduce ourselves. I would do my best to make the class interesting to my students. If my students don't study, I wouldn't get angry at them. I would teach younger students through games. I hope I become a good teacher!

If I were a teacher...

Fatemeh Sadat Allameh

If I could be a teacher, I go to the yard with my students and play soccer, volleyball, and basketball with them.

Because I love to have fun times with my students.

An Interview with Ms. Mohammadi

by Nazanin Zahra Mansouri

Nazanin: Hello Ms.Mohammadi. Can I ask you some questions?

Ms.Mohammadi: Sure! Ask anything!

Ok! Let's start with my first question!
During these 6 months what was your opinion about us?

I have good feelings about you. I have many different tasks but you make me feel good!

What's 8th grader's main feature in your mind?

Your special charectrestic that always amazes me is that you are full of energy! even more that 7th or 9th graders.

Have you ever felt very angry at us?
Have you ever wanted to hit us?

No! never but your biggest weakness is that you talk a lot! Even when I get angry at you because of the same reason! I try not to laugh since your reactions to my anger are really interesting!

8th graders!!!

What If you had a time machine....

What if I had a time machine? I could Explore History Firsthand for example back to the big historical moments or visit famous people ! it's very cool ! or I could discover lost civilizations and ancient secrets. I'll try to change the past I will Prevent disasters or change key events I can give past civilizations modern knowledge and see how history unfolds I can leave messages or clues for myself in the future. I can revisit my own past to fix mistakes or relive happy moments. I'll visit the future ! I can see how technology, society, and humanity evolve. I can see what my life will be like. I should be careful to don't do mistake to destroy the word :)

Zohreh Kolahdouz

8th grade

If I had a time machine, I would travel to the not-so-distant past, for example last year. Last year was a good year for me and I had a lot of fun

A trip to #Yazd

8th graders traveled to
Yazd this month.

#8th graders

I would like to know what will happen in the future, what good or bad situations I will find myself in, and whether I will still be friends with my current friends at that time. If I had a time machine, I would see moments from my life or future. I would change past decisions or prevent disasters. I think the concept of correcting mistakes through time travel is so attractive.

Imagine having the power to revisit pivotal moments in your life, allowing you to make different decisions. This ability could prevent personal regrets, avert disasters, or even save lives. With this power, you could right wrongs and steer events toward a more favorable outcome.

Traveling to the time of past events is something that I would like to do with my time machine. It's fun and I can clear doubts about them. For example, the time of ancient Iran or maybe the time of Hazrat Mohammad (peace be upon him and his family), Islam, and other religions. In general, it's fantastic to travel to other times. I hope that with the advancement of science, we can all travel to different times!

If I Had a time Machine...

Zahra Karami

7th grade

If I had a time machine, I would go back and relive the opportunities I had and missed. I think this is better, because at least one time is not wasted. And I would never travel to my future, because it is not good to consider our future as a monk.

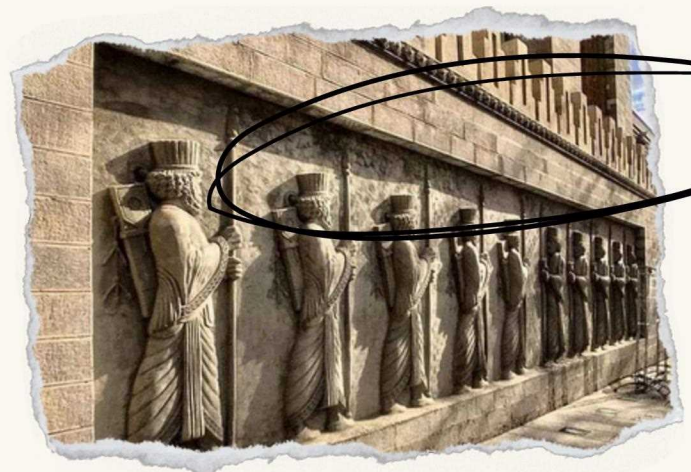

Fatemeh Tasnim
Sekhavat

If I could travel with a time machine, I would go to 10 years later in future and I won't come back. Because the entrance exam is very hard and I don't like it. In my idea the future is very beautiful.

Nazanin Zahra
Motiyee

If I could travel with a time machine, I would like to travel to the Achaemenid Empire and give them a very big gun to help them win the war.

Melika Mousavi

7th grade

If I had a time machine, I would definitely go to the times that I loved so that they would be repeated to me again, or I would go to the embarrassing times to change them.

Arefeh Foghani

8th grade

If I had a time machine, I would like to go back in time to the Achaemenid period. I would really like to know about the situation at that time, for example, visit Persepolis and see its palace and capital, see their empire and military power. Now that I think about it, I would also like to go to the future, for example, in 100 or 200 years, when technology has advanced so much that by thinking about a square, you can be there in a few seconds, and I would like to understand how the chip that Elon Musk designed works.

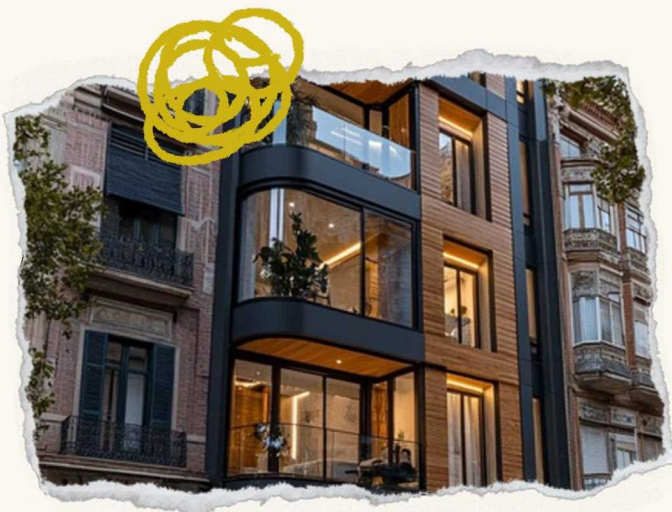

Helma Afsharnouri

8th grade

If I had a time machine , I'd like to visit future and travel to different country to see the modern architecture and understand what did they discovered .

I'd like to understand how much science has . progressed

What would you do if you had a time machine?

Bahman 22nd

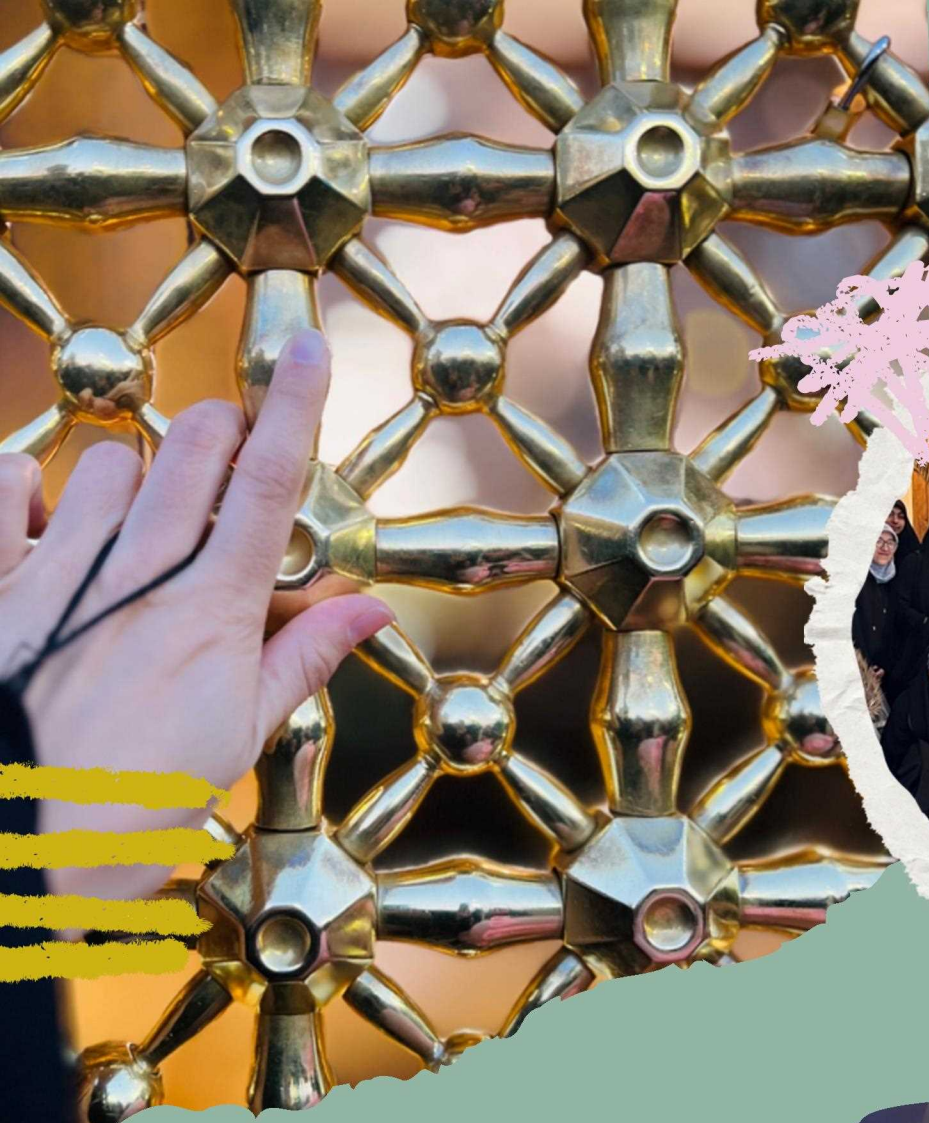

Iran's Day Of Unity and Victory

Hey there, dear students of Iran! As we approach Bahman 22nd, let's take a moment to reflect on this significant day in our nation's history. On this day, we commemorate the powerful uprising that led to the creation of the Islamic Republic of Iran. This victory serves as a symbol of our strength and resilience as a people.

We want to extend our warmest congratulations to all of you, the future of Iran, on this special occasion. May this day inspire you to continue striving for unity and progress in our beloved country.

Happy Bahman 22nd!
